Forecast for Thursday 05 May 2022

Weather: Early valley mist and shallow fog will quickly clear with sunny spells during the morning. Staying dry through the afternoon although becoming cloudier with some low cloud bringing misty conditions across some western slopes by evening. Low cloud will become more widespread during the evening.

Chance of cloud-free hill tops above 600m: 90% or better for much of the day, but deteriorating to 20% from the west late evening. .

Low cloud and visibility: Some shreds of low cloud on slopes near 300m in association with lifting fog, otherwise cloud bases above the summits during the morning and much of the afternoon. Areas of low cloud will develop on western slopes above 400-500m from mid to late evening. Visibility generally good below cloud by day, but poor in any valley mist and fog around dawn, and falling to a few km beneath the low cloud during the evening.

Meteorologist's View

A fine and dry day, however with long sunny spells and moderate to high UV levels, sun screen would be advisable if spending time on the mountains.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Wed 04 May 2022	1.4mm	1.4mm	1.8mm

Forecast for Friday 06 May 2022

Weather: Rather cloudy Friday, ahead of a band of rain which will reach the Brecon Beacons early to mid-afternoon, some heavier burst are possible at times with the bulk of the rain clearing by mid evening with cloud readily clearing from the north towards midnight.

Maximum wind: Southwesterly 10-15, gusting 20-25mph.

Chance of cloud-free hill tops above 600m: 40%

Low cloud and visibility: An extensive area of cloud with bases between 300-400m will give poor visibilities over summits for much of the day. Visibilities below the cloud will generally be good, however with the arrival of rain during the afternoon visibilities will dip towards moderate to poor. Cloud should start to break up and lift allowing some improvements late in the forecast period.

Temperature: **Valleys:** Plus 7 Celsius becoming plus 17 Celsius.
At 600m: Plus 9 Celsius.
Freezing level: Well above the summits.
